What is CapeDwarf?

CapeDwarf is an open-source alternative to Google App Engine, allowing you to run applications written for the Google App Engine on the WildFly Application Server without modification.

Application Server

<http://capedwarf.org/>
<http://wildfly.org/8/>

Google DataStore = Infinispan 6

Infinispan

<http://infinispan.org/>

appengine-java-sdk-1.9.48

The logo for Javassist, featuring the word "Javassist" in a large, white, sans-serif font on a dark teal background. Below the name, the text "Java bytecode engineering toolkit since 1999" is written in a smaller, lighter teal font.

Javassist

Java bytecode engineering toolkit since 1999

<http://www.javassist.org/>

Run on Linux

```
/servers/ServerAppCapedWarf/bin/standalone.sh -Denable.all  
-Djboss.node.name=node1  
-Dcom.google.appengine.runtime.environment=Production  
-Djboss.server.base.dir=/servers/ServerAppCapedWarf/standalone -c  
standalone-capedwarf.xml -b 0.0.0.0
```
